Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.   (Original)   A method in a computer system for preventing one or more immunizations from being administered to a person too early, the method comprising:

receiving the immunizations to be administered to a person;

determining whether it is too soon to administer the immunization; and

if so, outputting information that the immunization being administered too soon.

2.   (Original)   The method of claim 1, further comprising:

determining whether it is still safe to administer the immunization even though it is too soon to administer the immunization.

3.   (Original)   The method of claim 2, wherein if it is safe to administer the immunization, outputting information that it is safe to administer the immunization.

4.   (Original)   The method of claim 2, wherein if it is not safe to administer the immunization, outputting information that it is not safe to administer the immunization.

5.   (Original)   The method of claim 1, further comprising:

obtaining information regarding the safe timing of immunizations from a database.

6.   (Original)   The method of claim 5, further comprising:

obtaining information from an electronic medical record of the person stored within a comprehensive healthcare system.

7.   (Original)   The method of claim 6, further comprising:

utilizing the information from the electronic medical record of the person and the information regarding safe timing of immunizations to determine whether an immunization is being administered too soon.

8.   (Presently Canceled)

21.   (Presently Canceled)

22.   (Presently Canceled)

23.   (Presently Canceled)

24.   (Presently Canceled)

25.   (Presently Canceled)

26.   (Original)   A system in a computerized environment for preventing one or more immunizations from being administered to a person too early, the system comprising:

a receiving module for receiving the immunizations to be administered to a person;

a determining module for determining whether it is too soon to administer the immunization; and

an outputting module for outputting information that the immunization being administered too soon.

27.   (Original)   The system of claim 26, further comprising:

a second determining module for determining whether it is still safe to administer the immunization even though it is too soon to administer the immunization.

28.   (Original)   The system of claim 27, wherein if it is safe to administer the immunization, outputting information that it is safe to administer the immunization.

29.   (Original)   The system of claim 27, wherein if it is not safe to administer the immunization, outputting information that it is not safe to administer the immunization.

30.   (Presently Canceled)

31.   (Presently Canceled)

32.   (Presently Canceled)

33.   (Presently Canceled)

37.   (Presently Canceled)

38.   (Presently Canceled)

39.   (Presently Canceled)

40.   (Presently Canceled)

41.   (Original)   A system in a computerized environment for preventing one or more immunizations from being administered to a person too early, the system comprising:

      means for receiving the immunizations to be administered to a person;

      means for determining whether it is too soon to administer the immunization; and

      if so, outputting information that the immunization being administered too soon.

42.   (Presently Canceled)

43.   (Presently Canceled)

44.   (Presently Canceled)

45.   (Presently Canceled)

46.   (Original)   A computer-readable medium having computer-executable instructions for performing a method, the method comprising:

      receiving the immunizations to be administered to a person;

      determining whether it is too soon to administer the immunization; and

      if so, outputting information that the immunization being administered too soon.

47.   (Presently Canceled)
